Technical properties

Density at + 23 °C [g/cm ³]	~ 0,8
Shelf life at 23 °C/50 % RH [years]	5

These data are not suitable for the issue of specifications.
Please contact OTTO-CHEMIE before issuing specifications.

Pretreatment

Remove possibly existing old sealants / adhesives mechanically or with OTTO SilOut completely before cleaning. The adherent surfaces have to be prepared so, that stability is given, i. e. corroded metals must be released from oxide layers like rust.

Important information

The cleaner has been developed for OTTO sealants / adhesives to ensure an optimal adhesion in combination with these.

Application information

Apply Cleaner with a lint-free cloth or similar and sufficient pressure on the joint flanks in order to achieve a good cleaning effect. If the surfaces are badly soiled or greasy repeat the process and rub the surface afterwards with a clean and dry cotton-cloth. Due to the many possible influences during and after application, the customer always has to carry out trials first.

Packaging

	100 ml aluminium bottle	250 ml aluminium bottle	1,000 ml aluminium bottle	5 l tin canister	10 l tin canister	25 l tin drum with tap hole*
○ colourless	RET-50	RET-51	RET-55	RET-58	RET-60	on request
Pieces per packaging unit	15	15	5	1	1	1
Pieces per pallet				82	50	

* OTTO Drain cock 2" with venting (AERO-FLOW) sold separately
